

## **Working on a team disadvantage & advantages**

Kelsey McMahon, Joshua Merrell, Alan Moss, Michael Nall

- Advantage: Working with your peers can expose you to different ideas and new tools that you can use to advance your programming abilities.
- Advantage: Solving complex problems can be easier when working with a team.
- Advantage: Working on a team helps improve your communication skills with others.
- Advantage: Getting to meet with your peers in the program and making connections that can be helpful for future classes and projects.
- Disadvantage: Working together on a project can be difficult when communicating changes and making sure there is no overlap in the work.
- Disadvantage: Having to work efficiently together and the possibility of having a team member that does not contribute.
- Disadvantage: Having to work in a group requires meetings which can take extra time to get work done.
- Disadvantage: Merging team members skills and abilities and having to work with members that might not be as experienced as the other members.
